TEAM SHIELD JERSEY
COMING SOON

The patented Team Shield jersey provides riders with all the right protection while allowing them to wear their team colors. The Louis Garneau patented back opening allows easy access to the jersey pockets and visibility of the race numbers. Sleeves are short to allow more versatility with the addition of warmers while still providing protection at the shoulders. A membrane provides protection at the front only and allows breathability and moisture evacuation at the back and sides. The sublimable Team Shield jersey is the solution to the new UCI requirements concerning apparel with team colors.

In-Mold construction

Evacuation channels: Moisture evacuation channels provide better airflow and moisture wicking.

Golf ball effect: Texturized surface on the front of the helmet helps achieve better laminar airflow.

Spiderlock® Pro-TT: Helmet stabilizing system featuring a polymer neck support. It can be easily tightened on the head using only one hand thanks to its dented anti-slip wheel, and its inclination can be adjusted to several positions.

Pro-lock divider: Small and light cam locking device to quickly adjust strap position.

Retractable ear¹: The retractable ear flaps open and close smoothly and effortlessly for a fast and easy transition without compromising the helmet's aerodynamics

Icefil padding: Keeps your head cool.

P-09 lens included: Color 7F7

Certifications: CPSC-ASTM-CEN

Vents: 4

Weight: 12.4 oz/350 g

¹ International Patent Pending

Customize your helmet with the included stickers of various colors or order decals that match your team colors. (5T0)

5S05250 QUARTZ II

S-M-L-XL

In-Mold construction

Super MSB technology: Ring-shaped plastic protection at the base of the helmet reinforces the perimeter for enhanced protection.

Composite reinforcement: Lightweight composite skeleton provides structural support and integrity on impact.

Integrated strap system with inner nerves: Inner frame which distributes the shock of impacts, thus providing support and protection while being lightweight.

Evacuation channels: Moisture evacuation channels provide better airflow and moisture wicking.

Spiderlock® Pro II: Helmet stabilizing system featuring a polymer neck support. It can be easily tightened on the head using only one hand, thanks to its dented anti-slip wheel. Its inclination can be adjusted to several positions.

Pro-lock divider: Small and light cam locking device to quickly adjust strap position.

Reflector decals: Safety first! Reflective stickers will make you more visible near motorists.

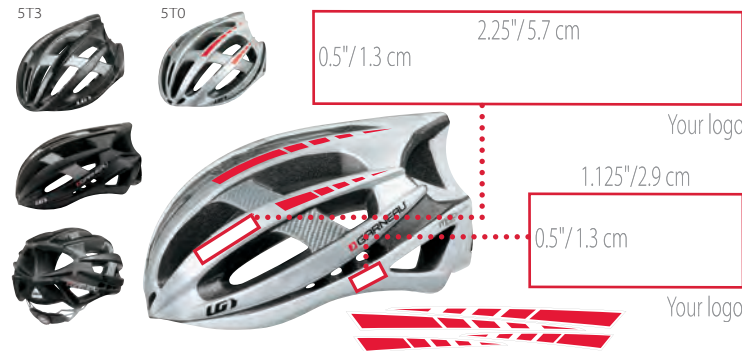

X-Static® XT2™ padding: Quick-drying antimicrobial material that inhibits growth of odor-causing bacteria. Its ergonomic design provides optimum comfort.

Spiderlock® Vision light included: Whether you ride early in the morning or late at night, the back light will ensure you'll be seen.

Certifications: CPSC-ASTM-CEN-AS 2063

1198202 LG1 SPORTS DRINK

1198252 LG1 SPORTS DRINK - MASTER PACK OF 6

A REFRESHING BEVERAGE WITH CONCENTRATED MINERALS

EXTRA ELECTROLYTE

LG1 SPORTS DRINK IS A BLEND OF NATURAL SUGARS FROM FRUIT, VITAMIN C AND EXTREMELY CONCENTRATED MINERAL SALTS THAT ENSURE OPTIMAL HYDRATION AND MAXIMAL ABSORPTION OF CARBOHYDRATES FOR IMPROVED PERFORMANCES.

25 g of carbohydrates: LG1 Sports Drink contains only natural sugars that provide the energy you need for your sports activities. A blend of simple and complex carbohydrates helps sustain intense and prolonged physical efforts.

Sodium: A liter of sweat contains 900 to 1,900 mg of sodium. In hot and humid weather, athletes can lose up to 2 liters of sweat. LG1 Sports Drink contains the quantity of sodium required to replace the one lost during the effort. Sodium helps maintain the body's water balance and ensures a better absorption and retention of carbohydrates and liquids during the effort. Sodium also helps improve the taste and stimulates the consumption of a sufficient quantity of liquid and electrolytes to improve athletic performances.

Vitamin C: Helps maintain immune function. It promotes the absorption of the iron required for oxygen transport and helps maintain healthy tissues, ligaments and bones, as well as contributing to the production of red blood cells.

Antioxidants: Protect cells from oxidative stress caused by free radicals produced by intense physical exercise and help maintain good health.

LG1 Sports Drink also contributes to the daily intake of potassium, magnesium and calcium, three important minerals for muscle contraction during an effort.

Light and fresh taste: Favors rehydration, even during intense periods of heat. It has been demonstrated that taste is an important factor to favor the consumption of a sports drink during physical effort.

MAPLE/LEMONADE

1198206
LG1 MAPLE SPORTS DRINK

1198256
LG1 MAPLE SPORTS DRINK - MASTER PACK OF 6

MAPLE SUGAR USED AS A SWEETENER,
A FIRST IN SPORTS DRINKS.

LG1 MAPLE SPORTS DRINK IS MORE THAN A BLEND OF NATURAL SUGARS FROM FRUIT, VITAMIN C AND HIGHLY CONCENTRATED MINERALS: IT CONTAINS 100% NATURAL MAPLE SUGAR WHICH PROVIDES THE IDEAL CARBOHYDRATES ATHLETES NEED TO PERFORM.

Maple sugar: A natural occurring sugar with a glucose:fructose ratio that is ideal for the absorption of carbohydrates during physical effort. It adds higher quality simple carbohydrates, providing you with additional energy that is rapidly assimilated to sustain your strength. Maple sugar contains beneficial vitamins and minerals such as manganese, riboflavin, zinc and potassium, which play a role in muscle contraction and recovery. It also contains 54 antioxidant compounds which protect cells from oxidative stress caused by free radicals produced by intense physical exercise.

Carbohydrates: LG1 Maple Sports Drink allows an optimal assimilation of carbohydrates during physical effort with minimal digestive side effects. Carbohydrates are assimilated both slowly and fast, allowing you to sustain a prolonged effort, and contributes to maintaining glycogen levels before and during intense physical effort.

Sodium: Helps improve the taste of the sports drink. It ensures a better liquid retention as well as better carbohydrates assimilation during effort. Sodium is also required to replenish the one lost in perspiration.

Flavor: LG1 Maple Sports Drink promotes hydration with its unique flavor and light taste, thanks to its 100% natural maple flavor.

1198205
LG1 RECOVERY DRINK

1198255
LG1 RECOVERY DRINK -
MASTER PACK OF 6

WITH THE USE OF WHEY PROTEIN, THE LG1 DRINK OFFERS A SUPERIOR QUALITY RECOVERY DRINK THAT ENSURES HYDRATION AND PROVIDES THE ENERGY REQUIRED TO RECOVER AND REBUILD GLYCOGEN RESERVES AFTER INTENSE AND PROLONGED PHYSICAL EFFORTS WHILE MAINTAINING MUSCLE MASS.

Protein Blend (WPI90 & WPC80): Two types of protein have been used to allow superior recovery. Whey Protein Isolate (90% protein, 1% lactose) provides the highest concentration of pure protein. Whey Protein Concentrate (80% protein, 5% lactose) provides all the interesting compounds and the valuable immune boosting protein subfractions removed in the filtering process to obtain Protein Isolate. The whey protein concentrate also contains more carbohydrates and fat, two important elements for recovery.

Combination of protein (12 g) and carbohydrates (55 g – 58 g): Helps stimulate protein synthesis, optimizes the repair of muscle fibers and aids in tissue reconditioning after intense physical effort. Carbohydrates also allow for the rapid replenishment of muscle and liver glycogen reserves.

Amino acid: LG1 Recovery Drink provides the necessary quantity of leucine, the most important amino acid for the protein synthesis process. It contributes to protein assimilation and muscle cell repair.

Addition of L-Glutamine: Aids in the recovery and can enhance digestive immunity by maintaining the intestinal wall's integrity.

Contains the necessary electrolytes for recovery after an endurance effort and helps prepare you for your next challenge.

Offers a new flavor made with 100% natural maple extract.

INGREDIENTS
ALL FLAVORS
MALTODEXTRIN, DEXTROSE, FRUCTOSE, PROTEIN BLEND (WHEY PROTEIN ISOLATE 90%, WHEY PROTEIN CONCENTRATE 80%), L-GLUTAMINE, ELECTROLYTE BLEND (SODIUM CITRATE, POTASSIUM, CITRATE, MAGNESIUM CITRATE, CALCIUM ASCORBATE), GUAR GUM, ASCORBIC ACID (VITAMIN C), NATURAL FLAVORS.

100% Natural - Gluten free

- Ultralight knit provides optimal ventilation.
- Allows excellent moisture wicking owing to its good moisture management properties.
- Textured back enhances ventilation while preventing from sticking to the skin and allows a cooling zone between the knit and the skin.
- Dries quickly.
- Odor-free owing to the properties of Cocona™ fibers.
- Stretch knit: 71% polyester, 29% Cocona™
- 77 g/m², 2.3 oz/sq yd.

DIAMOND

- Extremely light knit provides excellent airflow.
- Crosswise diamond-shaped construction provides the knit with good ventilation and moisture wicking properties.
- Dries quickly.
- Stretch knit: 60% mat polyester microfiber, 40% glossy polyester.
- 110g/m², 3.2 oz/sq yd
- Like all knits, it is recommended to avoid abrasive materials and surfaces.

- This product contains more Lycra® than basic knits for full stretch and shape recovery.
- Its compression and unique support maximize muscles' performance.
- Favors blood circulation in the muscle. Good blood circulation during long rides allows better performance and a resistance to fatigue from 10% up to 20% better.
- Absorbs and wicks moisture.
- Mondo + Lycra® fiber clothing is designed to fit muscles' shape and provide maximum support to muscular fiber.
- This knit has a UPF/SPF 50.
- Stretch knit : 75 % nylon Microtactel, 25 % Power + Lycra® Fiber.
- 255 g/m², 7.5 oz/sq yd.
- Like all knits, it is recommended to avoid abrasive materials and surfaces.

- coldblack® finish allows the heat to be reflected, unlike common dark textiles which absorb heat, thus preventing the user from overheating during physical activity
- Ultra textured construction allowing a better laminar airflow, which reduces the cyclist's drag factor and improves aerodynamics
- Wicks moisture thanks to its hydrophilic properties
- Its brick-like construction provides optimal airflow and exceptional comfort
- The beneficial effects of this compressive fabric are the result of an efficient combination of construction and the concentration of LYCRA® fiber
- This fabric has a UPF/SPF 50
- Stretch knit: 79 % nylon, 21 % LYCRA® fiber- Powered by LYCRA® SPORT ENERGY
- 220 g/m², 6.5 oz/yd²
- Like all fabrics, it is recommended to avoid contact with abrasive materials and surfaces

ULTRA SIGNATURE

- Stretchy knit with spandex content recovers its original shape after it has been stretched.
- Superior opacity unlike most knits used in the production of cycling shorts.
- The quality of the nylon used offers exceptional abrasion resistance to this knit.
- This fabric has a UPF/SPF 50.
- Stretch knit: 76% nylon, 24% spandex. 220 g/m², 6.5 oz/sq yd.
- Like all knits, it is recommended to avoid abrasive materials and surfaces.

- Protects you from the absorption of acid smog and static energy due to the antistatic properties of the carbon fiber.
- Its compression and unique support maximize muscles' performance.
- Favors blood circulation in the muscles. Good blood circulation during long rides allows better performance and increases resistance to fatigue by up to 10%-20%.
- Opaque mesh construction provides good ventilation when stretched.
- Incomparable comfort and recovery, reduced chafing – Made of Lycra® SPORT ENERGY fabric.
- DWR (Durable Water Repellent) treatment absorbs less water.
- This fabric has a UPF/SPF 50.
- Stretch knit: 80% micro-polyester, 15% Lycra® SPORT ENERGY fabric, 5% carbon
- 211 g/m², 6 oz/sq yd
- Like all knits, it is recommended to avoid abrasive materials and surfaces.

MICROZONE®

- Lightweight and resistant, this fabric is an excellent breathable windbreaker.
- WR (water repellent) finish to protect against the elements.
- Weave: 100% polyester microfilament.
- 78 g/m², 2.3 oz/sq yd.

- coldblack® finish allows the heat to be reflected unlike common dark textiles, which absorb heat, allowing the wearer to avoid overheating even during physical activity.
- This product contains more LYCRA® fiber than basic knits for full stretch and shape retention.
- Its compression and unique support maximize muscles' performance.
- Favors blood circulation in the muscles. Good blood circulation during long rides allows better performance and increases resistance to fatigue by up to 10%-20%.
- Absorbs and wicks moisture.
- CB Power + Lycra® fiber clothing is designed to fit muscles shape and provide maximum support to muscular fiber - Powered by LYCRA® SPORT ENERGY fabric.
- This knit has a UPF/SPF 50.
- Stretch knit: 75% Microtactel nylon, 25% LYCRA® fiber - Powered by LYCRA® SPORT ENERGY fabric.
- 270 g/m², 8 oz/sq yd.
- Like all knits, it is recommended to avoid abrasive materials and surfaces.

LIGHT POWER

- High content of spandex fiber for full stretch and shape management.
- Its compression and unique support optimize muscle performance
- Absorbs moisture and wicks it away from the body.
- This fabric has a UPF/SPF 50.
- 4-way stretch knit: 86% nylon, 14% spandex.
- 200 g/m², 5.9 oz/sq yd.
- Like all knits, it is recommended to avoid abrasive materials and surfaces.

THERMO STELVIO

- Stretch fabric with brushed back to retain body heat and wick moisture.
- This fabric has a UPF/SPF 50.
- Stretch knit: 87% nylon, 13% spandex.
- 235 g/m², 7 oz/yd²
- Like all fabrics, it is recommended to avoid abrasive materials and surfaces.

- coldblack® finish allows the heat to be reflected, unlike common dark textiles which absorb heat, thus preventing the user from overheating during physical activity.
- Stretchable fabric with the unique ability to expand and recover its shape like no other fiber.
- Compressive properties maximize muscular performance.
- Opaque construction blocks sun rays.
- This fabric has a UPF/SPF 50.
- Stretch knit: 80% polyester, 20% spandex.
- 240 g/m², 7 oz/yd²
- Like all fabrics, it is recommended to avoid abrasive materials and surfaces.

microAIRDRY

- Made of small inner honeycombs to increase airflow and wick moisture.
- This knit has a UPF/SPF 50.
- 2-way mechanical stretch knit: 100% polyester microfiber.
- 140 g/m², 4.1 oz/sq yd.
- Like all knits, it is recommended to avoid abrasive materials and surfaces.

- coldblack® finish allows the heat to be reflected unlike common dark textiles, which absorb heat, allowing the wearer to avoid overheating even during physical activity.
- Stretchable knit with the unique ability to stretch and recover its shape like no other fiber.
- This knit has a UPF/SPF 50.
- Stretch knit: 75% polyester, 25% LYCRA® fiber.
- 237 g/m², 7 oz/sq yd
- Like all knits, it is recommended to avoid abrasive materials and surfaces.

Invista™

POWER MESH

- Opaque mesh construction provides extreme breathability.
- Incomparable comfort and flexibility because of its spandex content that reduces chafing.
- Dries very quickly.
- 4-way stretch knit: 80% polyester, 20% spandex
- 177 g/m², 5.2 oz/sq yd.
- Like all knits, it is recommended to avoid abrasive materials and surfaces.

SUPER LIGHT Dry

- 2-ply knit protects from the elements.
- Made of a polyurethane membrane, with water-repellent and wind breaking properties, it enhances protection from the elements.
- 2-way mechanical stretch knit: 100% polyester, polyurethane membrane.
- 115 g/m², 3.4 oz/sq yd.
- Very good waterproofing.

- coldblack® finish allows the heat to be reflected unlike common dark textiles, which absorb heat, allowing the wearer to avoid overheating even during physical activity.
- Construction improving aerodynamics for speeds ranging from 25 to 70 km/h (15 to 45 mph).
- Wicks moisture because of its hydrophilic properties.
- Its dimpled mesh construction allows ventilation and comfort.
- The beneficial effects of this certified compressive fabric are the result of an efficient combination of fabric construction and spandex content.
- This knit has a UPF/SPF 50.
- 4-way stretch knit: 82% polyester, 18% spandex.
- 195 g/m², 5.75 oz/sq yd.
- Like all knits, it is recommended to avoid abrasive materials and surfaces.

SKINPRO

- Smooth surface fabric with moisture wicking properties
- This fabric has a UPF/SPF 50
- 2-way mechanical stretch knit: 100% polyester
- Like all fabrics, it is recommended to avoid abrasive materials and surfaces

WINDRUY

- 3-ply knit protects against the elements.
- Combination of two supple and soft-to-the-touch knits for better comfort on skin DWR (Durable Water Repellent) finish on the front provides efficient protection against water.
- Finish on the back that enhances moisture management properties.
- Micro-perforated polyurethane membrane allows a good protection against the elements because of its water repellent and windproof properties without compromising its excellent breathability.
- Merged knit: 100% polyester, polyurethane membrane.
- 313 g/m², 9.2 oz/sq yd.
- Very good breathability: 12,000 g/m²/24h.
- Very good waterproof quality: 10,000 m.

MICRO TRANSIT

- Brushed back knit keeps warmth and wicks moisture.
- 2-way mechanical stretch knit: 100% polyester
- 280 g/m², 8.3 oz/sq yd
- Like all knits, it is recommended to avoid abrasive materials and surfaces.

PATENTED

5MOTION
FITS THE BODY LINES

The innovative 5Motion design combines 3D preshaped wings and a deep slit at the back bridged by vented mesh to allow for multidirectional motion and amazing comfort.

Developed with B.E.M (Beveled Edge Molding) high-density perforated memory foam. This technology eliminates drastic drops of heights from one area to another, resulting in a smooth transition without pinching points to eliminate chafing.

PATENTED

4MOTION
ARTICULATED CHAMOIS

The innovative 4Motion design combines 3D preshaped wings and a deep slit at the back bridged by vented mesh to allow for multidirectional motion and amazing comfort.

4 additional mesh vents at the front for ventilation. Multi-thickness perforated high-density foam for better moisture evacuation.

PATENTED

MOTION AIRGEL
DURABLE COMFORT

The patented ergonomic shape, perforated and breathable gel inserts and multi-thickness perforated high-density foam make the Motion Airgel a comfortable chamois that's ideal for long rides.

The top sheet is made with CUPRON fabric, which contains a copper content that helps reduce irritation to the skin, procures antimicrobial properties and can help promote wound healing. CUPRON fabric is designed to provide long-lasting effect throughout the life of the product.

PATENTED

AIRZONE
OPTIMAL COMFORT

Developed with B.E.M (Beveled Edge Molding) high-density perforated memory foam. This technology eliminates drastic drops of heights from one area to another, resulting in a smooth transition without pinching points to eliminate chafing.

Vents are reduced in size but doubled in numbers to maintain breathability without sacrificing comfort.

TRI ELITE

TRI ELITE
LIGHT WITH CRABYON ADVANTAGES

Quick drying, ultra-thin chamois is multifaceted to accommodate swim, bike, and run. Antibacterial top layer accelerates wound healing, promotes tissue regeneration, and inhibits bacteria growth.

Because of this antibacterial function, CRABYON fabric retains its functions after washing and abrasion, and therefore these properties are not compromised after the swim portion of the race. Vents assist in water and moisture evacuation.

TRI AIR

TRI AIR
LIGHT AND BREATHABLE

An ultra-thin, lightweight chamois with 4-way stretch to accommodate swim, bike, and run.

Quick-drying and breathable.

Fabric is treated with antibacterial solution to combat the effects of retained moisture which can increase the growth of bacteria.

CD MINI

CD MINI
LIGHT

Lightweight, quick-drying fleece chamois provides good protection while on the bike.

delfino

- Its dimpled mesh structure provides ventilation breathability, but has above all great hydrodynamic and aerodynamic properties.
- The shape stability of this knit provides excellent muscle support.
- This fabric absorbs less water and therefore dries much faster.
- Extremely stable high-quality product that maintains its properties and color after being exposed to chlorine.
- This knit has a UPF/SPF 50.
- 4-way stretch knit: 80% nylon, 20% spandex.
- 195 g/m², 5.7 oz/sq yd.
- Like all knits, it is recommended to avoid abrasive materials and surfaces.

micro AIRDRY

- Made of small inner honeycombs to increase airflow and wick moisture.
- This knit has a UPF/SPF 30.
- 2-way mechanical stretch knit: 100% polyester microfiber.
- 140 g/m², 4.1 oz/sq yd.
- Like all knits, it is recommended to avoid abrasive materials and surfaces.

- coldblack® finish allows the heat to be reflected unlike common dark textiles, which absorb heat, allowing the wearer to avoid overheating even during physical activity.
- This product contains more LYCRA® fiber than basic knits for full stretch and shape retention.
- Its compression and unique support maximize muscles' performance.
- Favors blood circulation in the muscles. Good blood circulation during long rides allows better performance and increases resistance to fatigue by up to 10%-20%.
- Absorbs and wicks moisture.
- CB Power+Lyra® fiber clothing is designed to fit muscles shape and provide maximum support to muscular fiber - Powered by LYCRA® SPORT ENERGY fabric.
- This knit has a UPF/SPF 50.
- Stretch knit: 75% Microtactel nylon, 25% LYCRA® fiber - Powered by LYCRA® SPORT ENERGY fabric.
- 270 g/m², 8 oz/sq yd.
- Like all knits, it is recommended to avoid abrasive materials and surfaces.

TRITEK

- Construction improving aerodynamics for speeds ranging from 25 to 70 km/h (15 to 45 mph).
- Its dimpled mesh construction allows for ventilation and comfort.
- The beneficial effects of this certified compressive fabric are the result of an efficient combination of fabric construction and spandex content.
- DWR (Durable Water Repellent) treatment absorbs less water (nylon version only).
- This fabric gives an excellent aerodynamic and hydrodynamic suit required in triathlon (wind-tunnel tested).
- This fabric has a UPF/SPF 50.
- Nylon version: stretch knit: 77% nylon, 23% spandex.
- Polyester version: stretch knit: 77% polyester, 23% spandex.
- 190 g/m², 5.6 oz/sq yd.
- Like all knits, it is recommended to avoid abrasive materials and surfaces.

POWER MESH

- Opaque mesh construction provides extreme breathability. Incomparable comfort and flexibility because of its spandex content that reduces chafing.
- Dries very quickly.
- 4-way stretch knit: 80% polyester, 20% spandex
- 177 g/m², 5.2 oz/sq yd.
- Like all knits, it is recommended to avoid abrasive materials and surfaces.

- coldblack® finish allows the heat to be reflected unlike common dark textiles, which absorb heat, allowing the wearer to avoid overheating even during physical activity.
- Construction improving aerodynamics for speeds ranging from 25 to 70 km/h (15 to 45 mph).
- Wicks moisture because of its hydrophilic properties.
- Its dimpled mesh construction allows ventilation and comfort.
- The beneficial effects of this certified compressive fabric are the result of an efficient combination of fabric construction and spandex content.
- This knit has a UPF/SPF 50.
- 4-way stretch knit: 82% polyester, 18% spandex.
- 195 g/m², 5.75 oz/sq yd.
- Like all knits, it is recommended to avoid abrasive materials and surfaces.

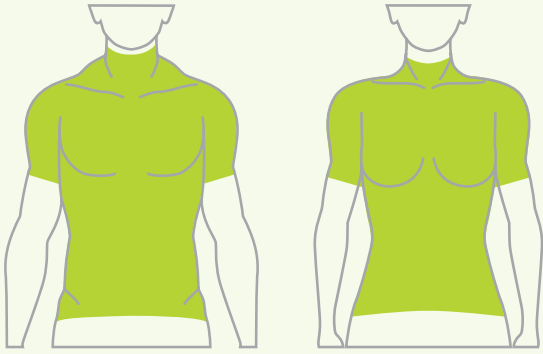

TRI-REV

- Contains more LYCRA® fiber than basic fabrics for full stretchability and shape recovery.
- High-quality product that maintains its properties and color after being exposed to chlorine.
- Dries very quickly thanks to its exceptional breathability.
- Lightweight and opaque fabric provides excellent resistance to abrasion and offers exceptional brightness.
- This fabric has a UPF/SPF 50.
- Stretch knit: 80% polyester, 20% XTRA LIFE LYCRA® fiber.
- 190 g/m², 5.6 oz/yd².
- Like all fabrics, it is recommended to avoid abrasive materials and surfaces.

LIGHT POWER

- High content of spandex fiber for full stretch and shape management.
- Its compression and unique support optimize muscle performance
- Absorbs moisture and wicks it away from the body.
- This fabric has a UPF/SPF 50.
- 4-way stretch knit: 86% nylon, 14% spandex.
- 200 g/m², 5.9 oz/sq yd.
- Like all knits, it is recommended to avoid abrasive materials and surfaces.

AERODYNAMIC

RACER FIT

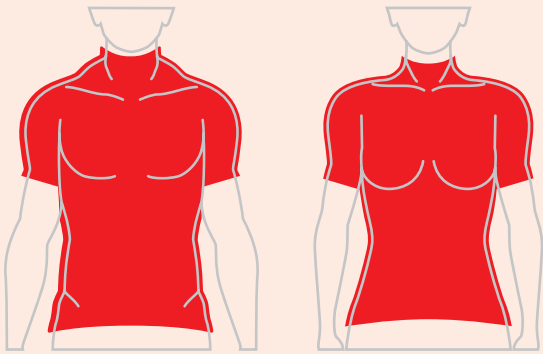

Aerodynamic design with next to skin feel. Optimized cut for on-bike position. The Racer Fit is 1 size smaller the Standard Fit.

ELITE

PERFORMANCE

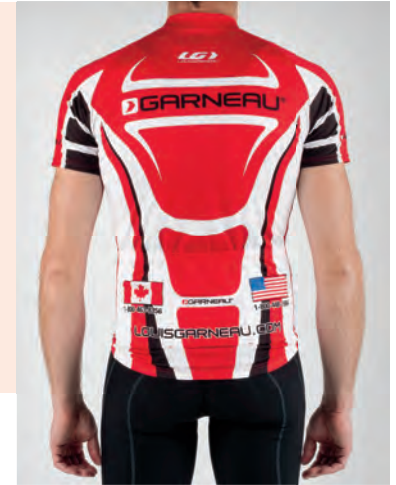

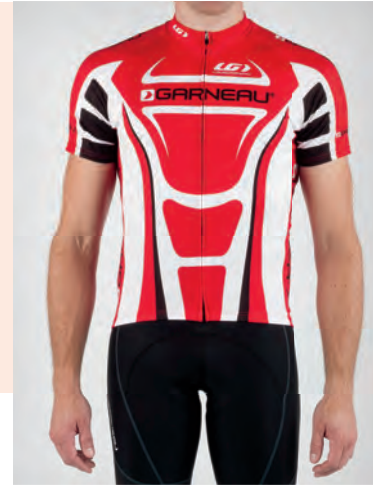

STANDARD FIT (ProFit)

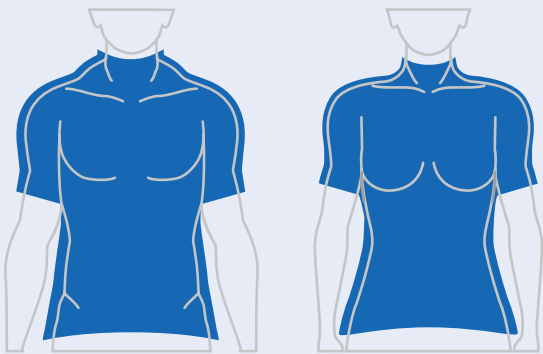

Close to the body. Performance cut with comfort in mind.

PERFORMANCE

COMFORT

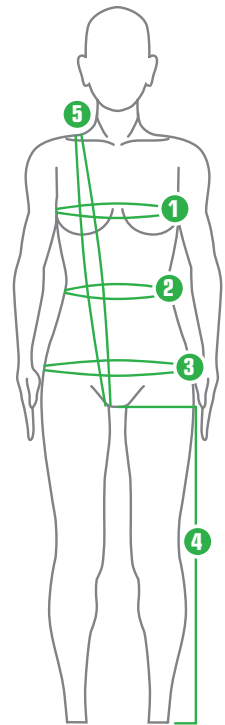

SEMI-RELAX FIT

Ample cut with space for shoulders, neck, torso and arms.

**LOUIS GARNEAU HAS THE
PERFECT SOLUTION TO
MANAGE YOUR CUSTOM
CLOTHING ORDER. NO MORE
HEADACHES FIGURING OUT
SIZING AND COLLECTING
QUANTITIES AND MONEY:
P.P.R. DOES IT FOR YOU!**

lgpickpayride.com

PICK. PAY. RIDE.
THE GARNEAU P.P.R. SYSTEM

PICK.PAY.RIDE. FAST.EASY.SIMPLE.

PICK.

With the help of our Custom Specialists, we will help you decide which styles are right for your team. We offer three levels of gear to suit your needs as a rider as well as your budget. We can even work to survey your team members on their preference of styles before a final selection is determined (optional). When the right styles are determined, we will build your team store and set deadlines. As team manager, you will have access to reports allowing you to follow the order through the entire process.

PAY.

Email your members or even post a link to your team store on your website and/or Facebook page. This will allow your members to visit the store, enter their sizing, and even pay for their kits! Automatic reminders (1-7 days before the close date) are set to help you move the order process along. We can even help you collect team dues to help cover extra costs like shipping. They can be added as a mandatory fee to each order, and when the order is complete, we hand you a check!

RIDE.

After all orders are submitted and art is approved, production begins. Within 6-8 weeks, your team will be riding in some of the most innovative custom apparel in the market.

7 REASONS TO CHOOSE P.P.R.

- Perfect for teams with a large volume
- Saves time as each member pays individually
- Possibility of including membership fees in the prices
- Communication hub for the team manager
- Easy to place an order and to manage the team order
- Tool that offers a complete apparel line
- Possibility of including shipment costs in the prices
